**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I: figures 1-3,

Group II: figures 4-6,

Group III: figures 7-13,

Group IV: figures 14-17,

Group V: figures 18-19,

Group VI: figures 20-23,

Group VII: figure 24,

Group VIII: figures 25-28,

Group IX: figures 29-30,

Group X: figures 31-32,

Group XI: figure 33, and

Group XII: figures 34-35.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 3727

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1 and 22.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: A cursory examination of the case reveal that claim 1 is unpatentable over the Bemiss (4304335). Thus, the species lack the same or corresponding special technical features and the patentability is thus relied upon the specificities of the numerous disclosed species for patentability.

3. A telephone call was made to Merchant & Gould on 09/23/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Due to the numerous claims in the present application, applicant is request to elect a single species and identify the claims readable on the elected species, including any claims

subsequently added. Failure to do so would not be considered a bona-fide attempt in view of this request.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tri M. Mai whose telephone number is (703)308-1038. The examiner can normally be reached on 7:30am-5:00pm.
